

1. 
2. 
3. 
4. 

squash  
(both sides)
5. 

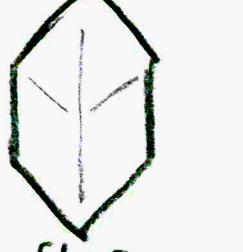

switch faces
6. 

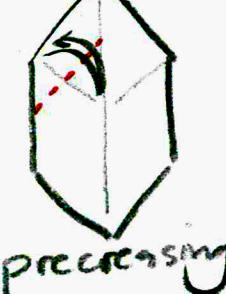

open back up
7. 
8. 

open sink  
both sides
9. 

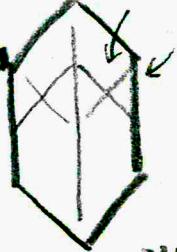

(after sink)
10. 
11. 

put point to  
center of paper
12. 

repeat on  
other side  
(6 to 11)
13. 

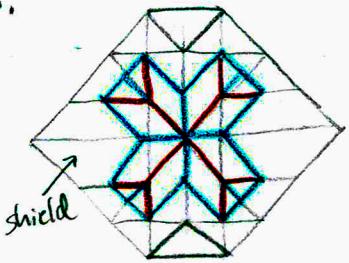

after
14. 

precressing
15. 

appennance  
mid-crease
16. 

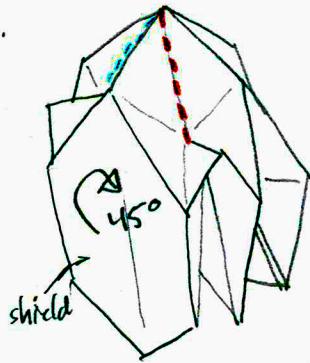

repeat 14-15  
on 3 other  
parts  
(result shown)

18.

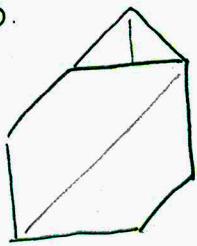

open to this.  
collapse along these  
lines as shown...

19.

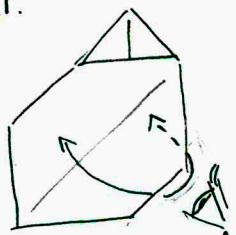

appearance mid-  
collapse. Twist  
shields 45°... model  
will lie flat!

20.

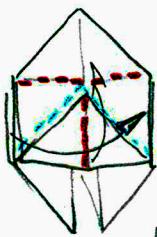

appearance after  
collapse

21.

pick up model;  
opening symmetrically  
like a book. Look  
inside...

22.

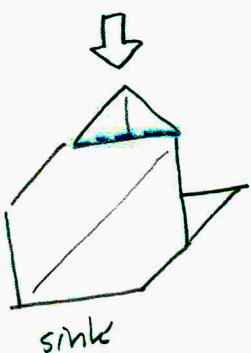

close model,  
folding piece  
up.

23.

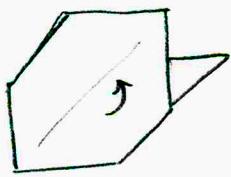

24.

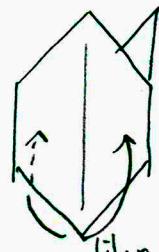

sink

25.

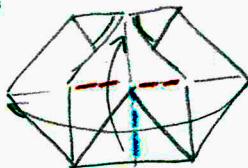

turn  
model 45°

26.

open like a  
book, look in  
from underneath

27.

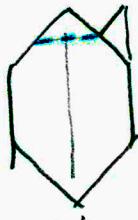

lift flap as  
shown, closing  
book.

28.

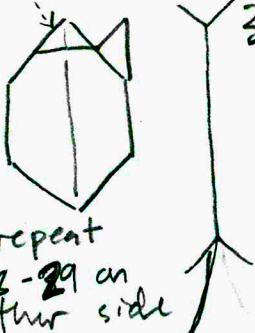

crease

29.

sink

30.

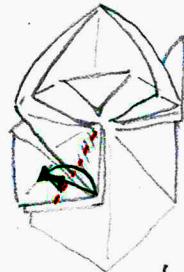

repeat  
28-29 on  
other side

31.

lift wing  
as far as you  
can

32.

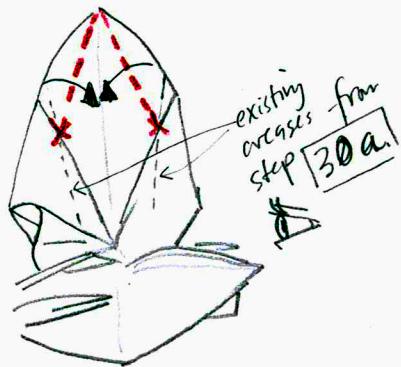

slide tips to  
match angle.  
Now, look up at  
wing...

a.

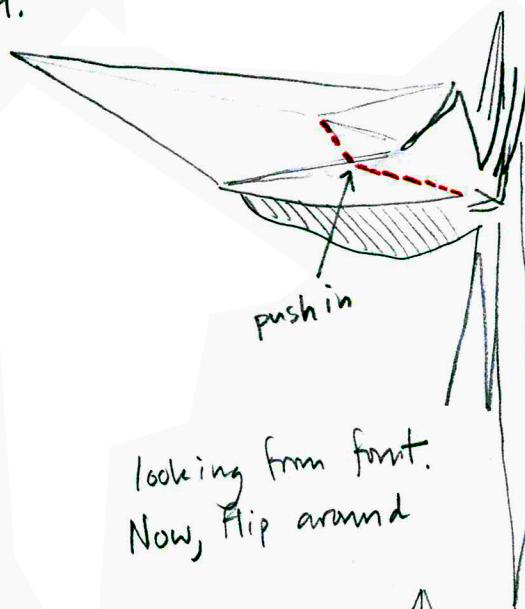

crease

33.

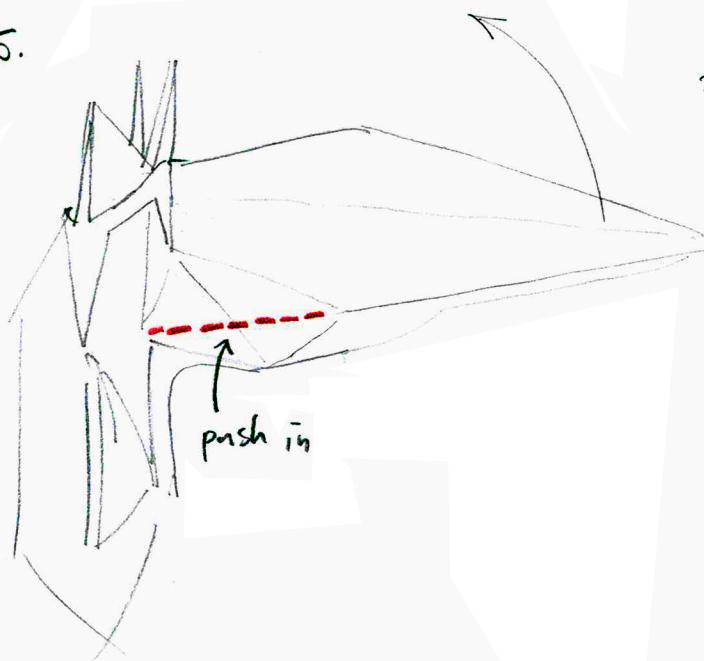

fold exterior in,  
then look from the  
front

34.

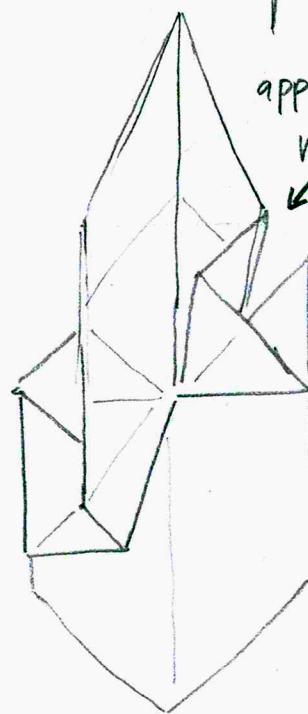

looking from front.  
Now, flip around

35.

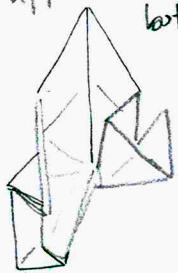

36.

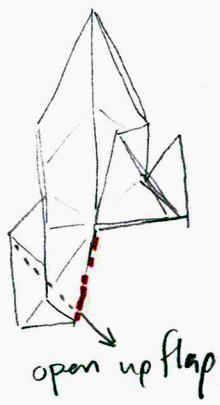

appearance after wing folds up.  
model lies flat!

37. repeat on the  
~~other~~ other side  
(steps 30a → 36)

appearance after  
both wings.

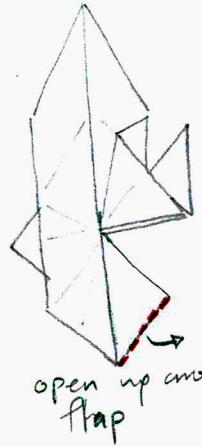

38.

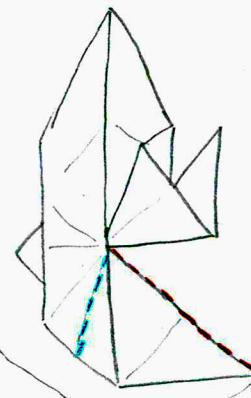

open up flap

39.

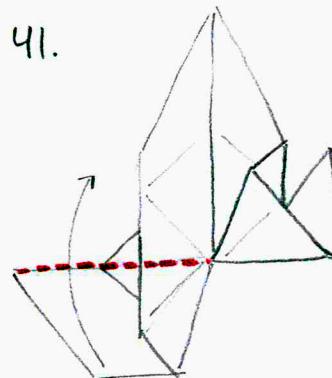

open up another  
flap

40.

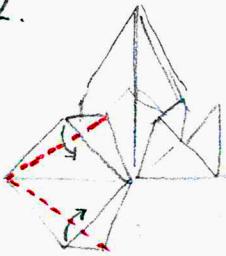

put back

41.

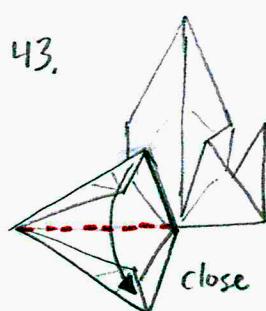

open inside flap

42.

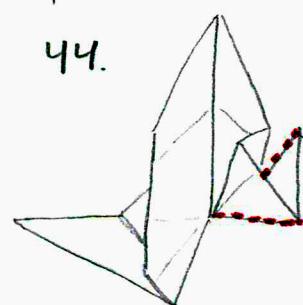

43.

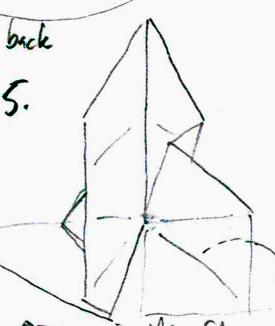

close

44.

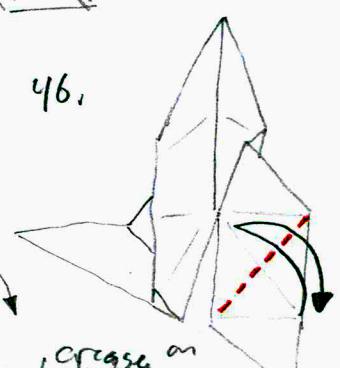

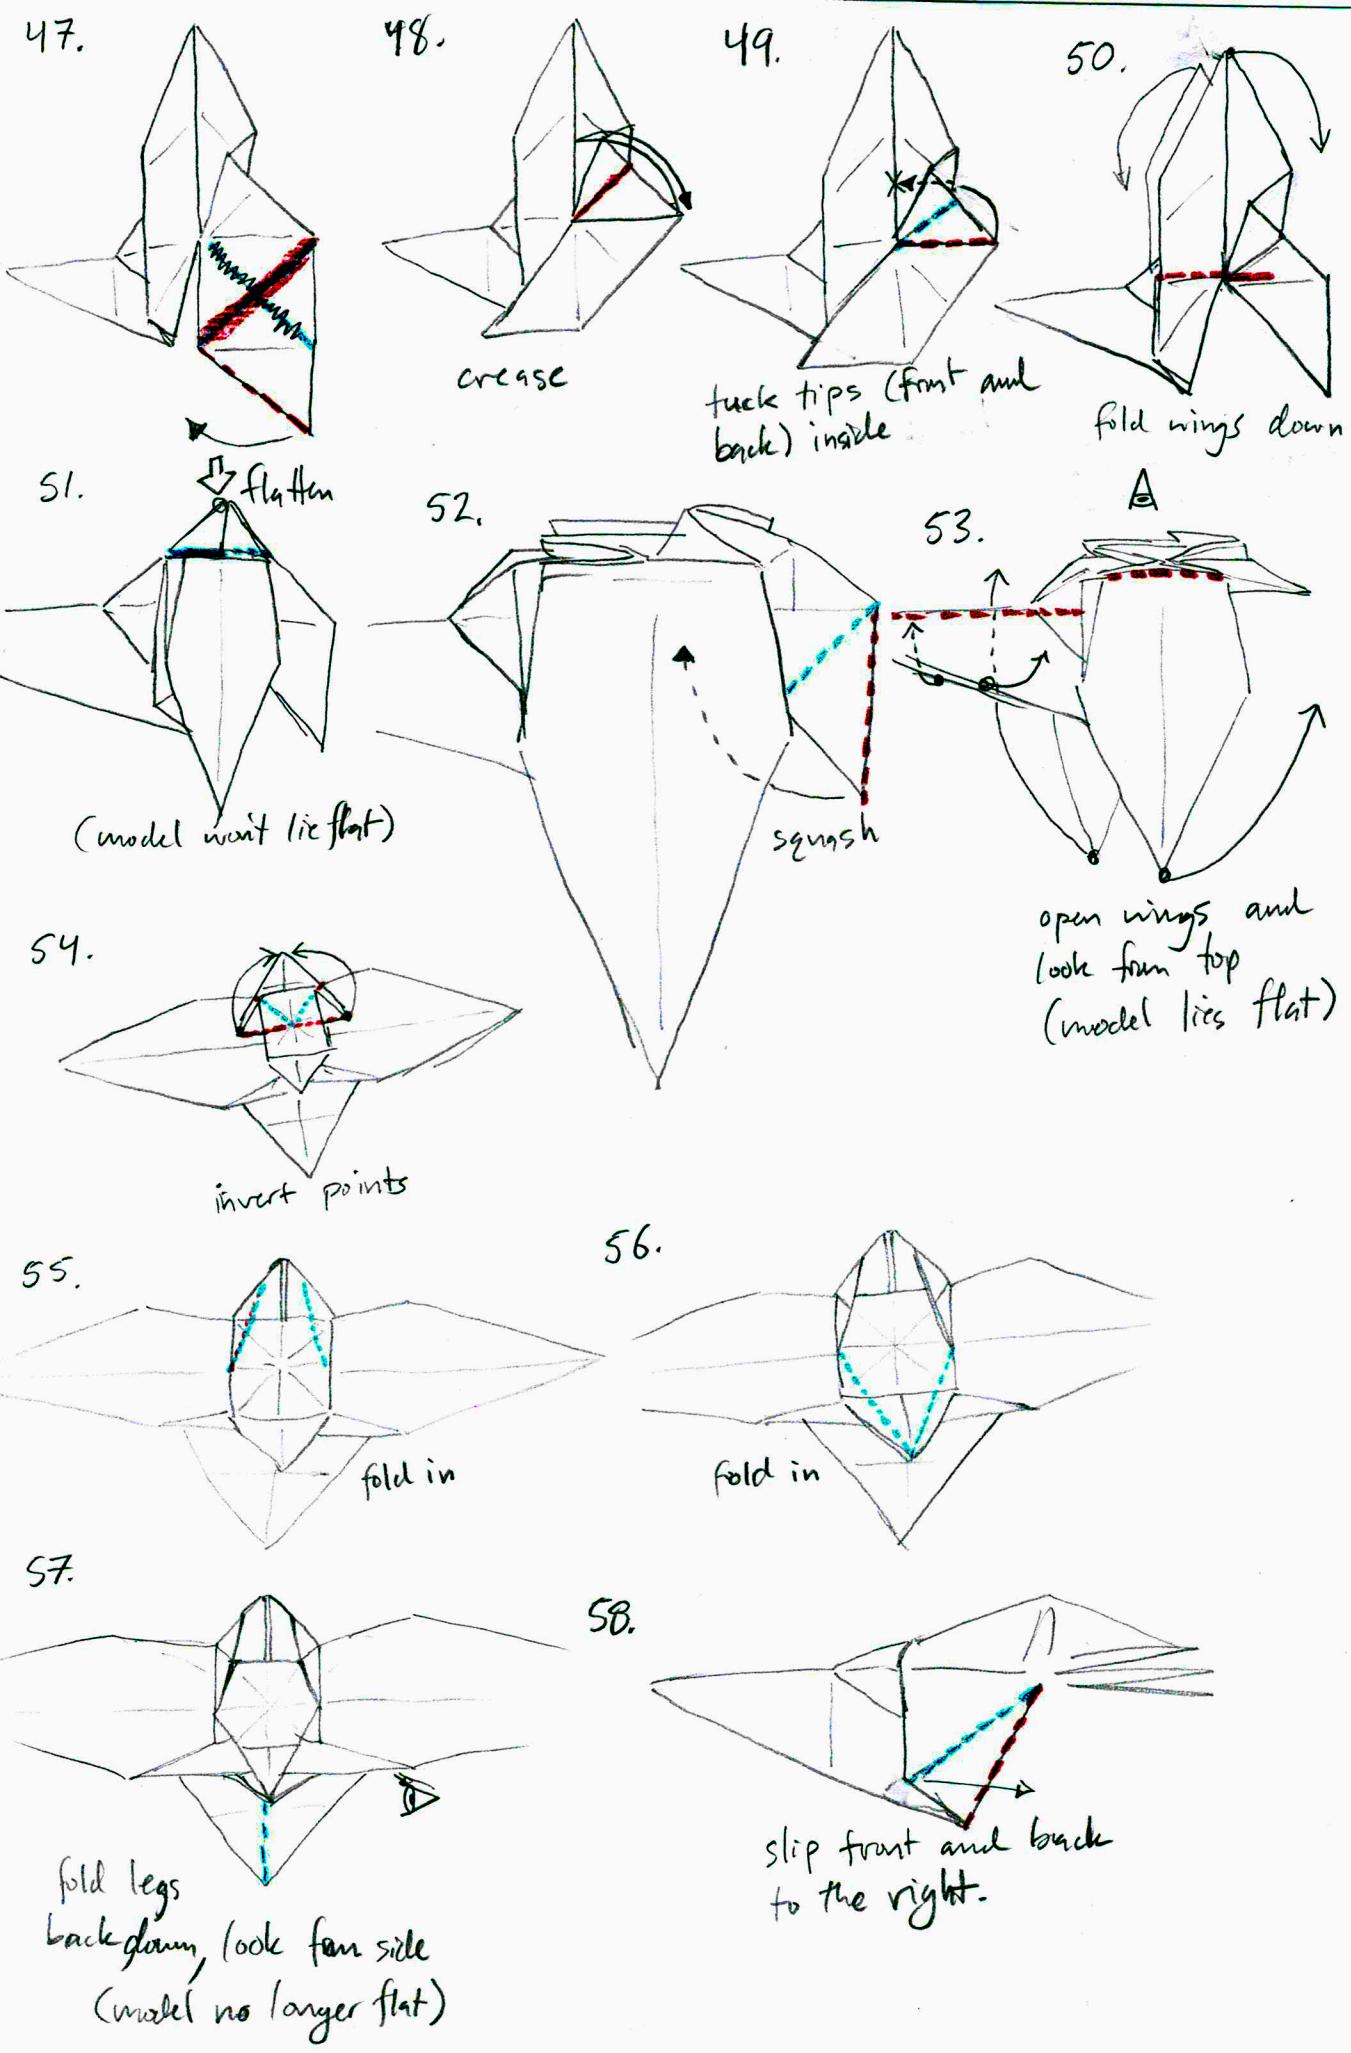

open inside flap

45.

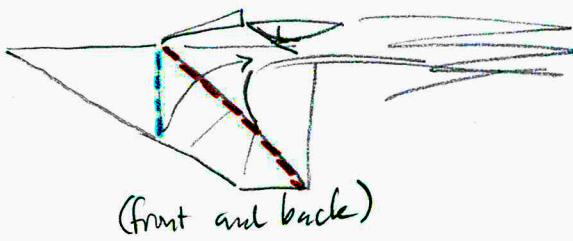

crease an

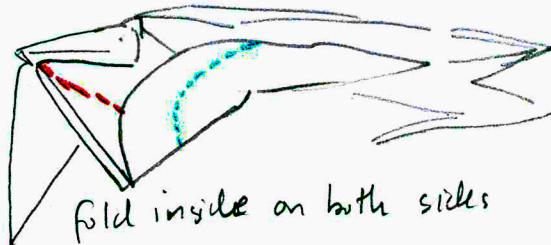

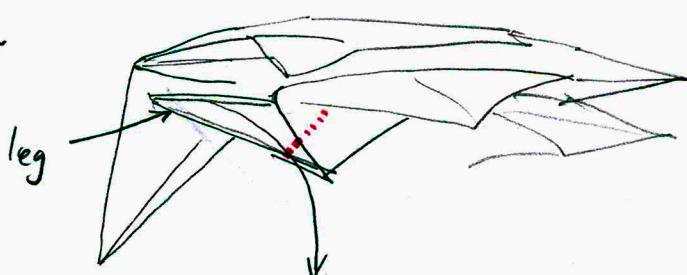

59.

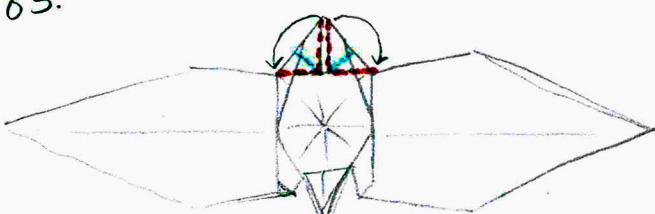

61.

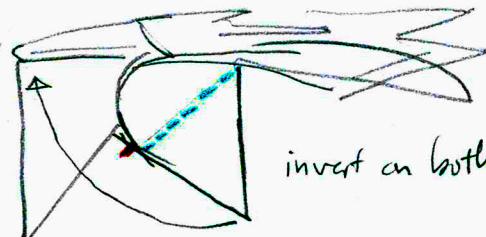

63.

65.

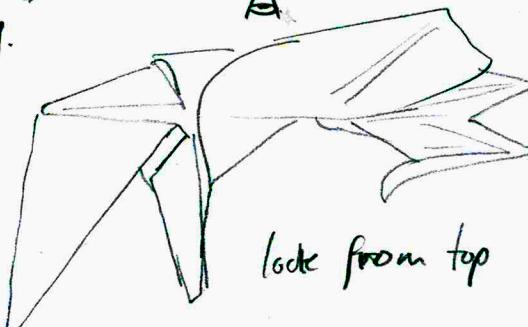

60.

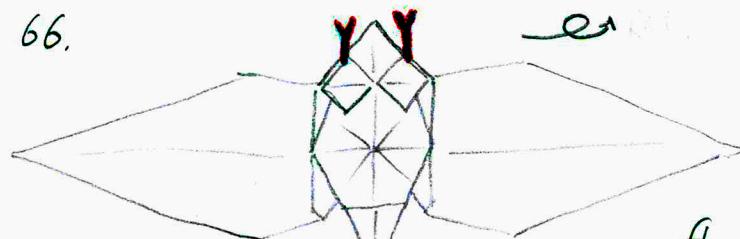

62.

64.

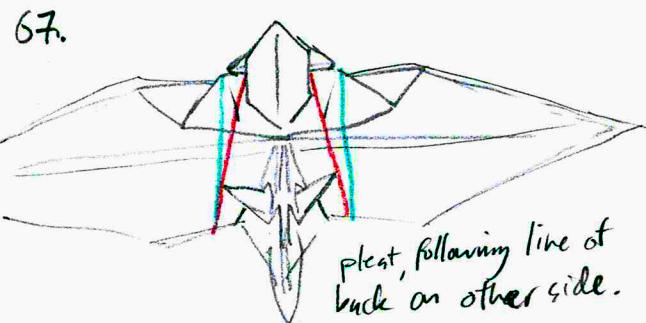

66.

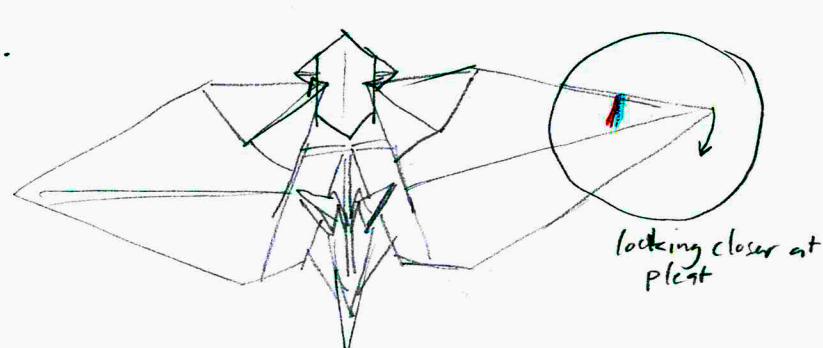

valley fold underneath ears, flip over

67.

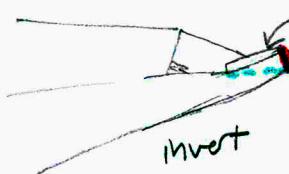

68.

69.

70.

71.

after, repeat 68-70 on other wing.  
zoom out, and  
flip over.

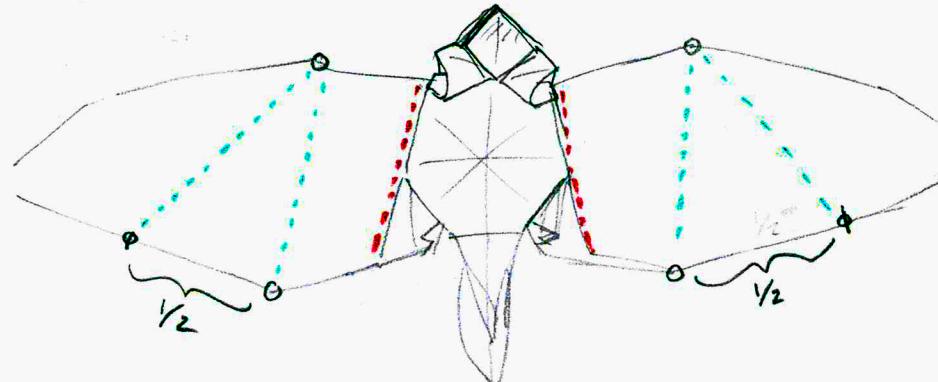

Primary folding is done, now  
we shape the final model!

72.

tip down

open up to form ears

73.

gently crease (but don't fold)  
for lines.
